Europe: Human Geography | National Geographic Society

The study of regional landscape change varied in different national contexts and was by no means always described by the term 'historical geography'. Continental European research on regional - and especially rural - landscape change continued without embracing a new disciplinary terminology.

Historical Geography - Articles - Making History

Europe is traditionally defined as one of seven continents. Physiographically, it is the northwestern peninsula of the larger landmass known as Eurasia; Asia occupies the eastern bulk of this continuous landmass and all share a common continental shelf. Europe's eastern frontier is delineated by the Ural Mountains in Russia. The southeast boundary with Asia is not universally defined, but the modern definition is generally the Ural River or, less commonly, the Emba River. The boundary continues
