### Chemistry Nail Lab Answers - happybabies.co.za

So, we did a lab in class called Nail Lab. We had to get three iron nails and put them into copper (ii) chloride solution. They had instant rust. We measured and all. But my questions are the conclusion questions: 1) Why did the reaction stop? Which reactant was used up? How do you know? 2)

Describe what was happening to the atoms of iron and copper during the reactions.
