A reference manual format is devoted to explaining the individual features of a software application (button, tab, field, and dialog box) and how they work. Many help files are written in this format, particularly context-sensitive help that displays a relevant topic whenever a user clicks the Help button on a particular screen.

2 - Write great titles. Great end user documentation consists of titles that are specific, and often in the form of performing a task. This not only makes it easier for your end users to find what they are looking for, but it helps you write better articles. For example, think about how much time it would take to write an article titled "Contacts,"
