Soviet Destroyers Of World War

There were fourteen different classes of destroyers that were used by the Soviet Navy in World War II: Yakov Sverdlov class Destroyer; Frunze class Destroyer; Orfey class Destroyer; Izijaslav class Destroyer; Fidonisy class Destroyer; Leningrad class Destroyer - 6 operational in July 1941; Tashkent class Destroyer; Type 7 class Destroyer - 28 operational in July 1941

Soviet World War II destroyers - Wikipedia

The most numerous of World War II-era Soviet destroyers, the modern well-armed (130mm main gun) Type 7 and 7U, served in all fleets, including the Pacific, and eventually received RADAR and ASDIC capability as part of the Allied war effort, even if their crews were not trained to use them

effectively.

Soviet Destroyers of World War II | Naval Historical ...

Some Soviet naval vessels saw limited involvement in the war against Finland in 1939-1940, but the main action occurred after the German invasion, when these destroyers escorted convoys, fought battles against other destroyers and the deadly threat posed by attacking aircraft, and provided fire support for Soviet troops.

The U.S. Navy long believed that the Soviet Navy would undertake a role during World War III essentially similar to that of the Germans in World War I and World War II. First, Soviet submarines would attempt to penetrate the North Atlantic through the GIUK gap— the open-sea choke point between the land masses of Greenland, Iceland and the United Kingdom.

So, various articles quote almost the same thing, "17 diesel-powered attack submarines, a cruiser, a destroyer and a frigate, then threw in a few civilian oil tankers". My question is, what ships were these? Is it known what class of ships were in the deal, or the names of the ships? Were they WW2 era ships, post war ships? What about the subs?
