The Whole Body Cure

Edema is swelling caused by excess fluid trapped in your body’s tissues. Although edema can affect any part of your body, you may notice it more in your hands, arms, feet, ankles and legs. Edema can be the result of medication, pregnancy or an underlying disease — often congestive heart failure, kidney disease or cirrhosis of the liver.

Edema - Symptoms and causes - Mayo Clinic

What if you could just treat the whole person with dietary changes, upgrading the information given every day to your body through food?
