Emotor - Electric motor winding calculator

For three phase motor amps calculation the below formula is used. 3 phase motor current calculation formula is $P / (\sqrt{3} \times V \times P_f \times \text{Eff})$ or $P / (1.732 \times V \times P_f \times \text{Eff})$ Both are same. So our motor power is 15KW with $15 \times 1000 = 15000$ Watts. Motor volts is 380 volts, Eff is 0.89 and
